FOR IMMEDIATE RELEASE

The American Holistic Nurses Credentialing Corporation and the American Holistic Nurses Association Announce the Release of New Holistic Nursing Curriculum Guidelines for Mid October

The American Holistic Nurses Credentialing Corporation (AHNCC) in concert with the American Holistic Nurses Association (AHNA) announces a new document that can be used to standardize Holistic Nursing educational processes for those entering the nursing profession.

The Foundations, Competencies, and Curriculum Guidelines for Basic to Doctoral Holistic Nursing Education builds on AACN’s Essentials of Basic and Graduate Education and is designed to describe the why, what, and when of Holistic Nursing Education.

These Curriculum Guidelines reflect more than two years of work by AHNCC in concert with AHNA. Reviewers included Holistic Nurse experts from the AHNCC and AHNA Boards, AHNCC Endorsed Program Faculty, Nurse Theorists, Nurse Leaders, and others. For more information related to material that preceded this work click here.

The First Edition of the Curriculum Guidelines will be available for complimentary download from October 15, 2017-September 30, 2018. The Second Edition will be available by hardcopy for a minimal charge. Tool Kits and Webinars for nursing educators will be available starting in January 2018. Their availability will be announced in AHNA’s eNewsletter and AHNCC’s website.

An interactive blog, administered by the authors of the document, webinar dates, announcements, and toolkits availability, will be announced on the AHNCC website www.ahncc.org commencing October 15, 2017.
